

## PAPER FLOWERS

Make your own paper flowers to create a beautiful Spring bouquet!

### SUPPLY LIST

- Construction Paper
- Hole Punch
- Dowel
- Ribbon
- Pencil
- Scissors
- Tape

### INSTRUCTIONS

1. Trace a flower shape on construction paper. We made tulips, but you can branch out and try other flowers if you'd like!
2. Use the scissors to cut out your flower shape.
3. Fold the paper like an accordion.
4. While the paper is folded, use the hole punch to make a hole in the center of the paper.
5. Place the dowel through the hole.
6. Gently unfold your paper and watch your flower bloom!
7. Cut a piece of ribbon to wrap around the dowel to decorate the stem. The length of ribbon that you cut will depend on how tightly you would like to wind it around the dowel.
8. Wrap the ribbon around the dowel, and use tape to attach it at the ends.
