

3D HOLIDAY REINDEER

SUPPLY LIST

- Markers
- Glue Stick
- Construction Paper (various colours)
- Scissors

INSTRUCTIONS

1. First, let's start with the body. Take a sheet of construction paper and fold it in half the long way, then cut along the fold
2. Apply glue to one end of the halves and roll it into a large tube
3. Take the other strip of paper and fold it in half width-wise
4. Cut out a "U" shape at the open end for the legs
5. Fold the legs about 1-2cm to make feet. Make sure you fold them all together!
6. Glue the hind legs on your paper base (green, blue, white - whatever you'd like!) and use a marker to colour in the hooves
7. Glue the front legs onto the base, creating a nice arch for the body and colour in the hooves
8. Cut a tail out of construction paper and glue it onto the body
9. Cut antlers and a red nose out of construction paper and glue it onto the head
10. Draw on the eyes and a smile with a marker
11. Glue the head onto the body
12. Give it a bit of time to dry and then display in all its red-nosed glory!

TIPS

- Make your reindeer feel more at home with trees in the background! Add a tree and decorate it, then glue it onto your base for a lovely background (as seen in the picture).
- To add even more "wow" to your reindeer, here are some other things you can use!
 - Googly eyes
 - Red pompom for the nose
